

# US Farm Lease Preferred Professionals

We are seeking Preferred Professionals to join our growing business. Our company focuses on helping farmland owners lease their property through a web-based bid and application collection system. Our Preferred Professionals are companies and individuals who are ready to assist clients who visit our site but find that they need help leasing their properties. Preferred Professionals working with us charge their regular fees and grow their client networks.

What role will you play? We need professionals to provide step-by-step assistance to landowners using the US Farm Lease website. These professionals can be from many fields, including realtors, farm managers, crop advisors, bankers, trust officers and so on. The most important requirements are having a working knowledge of land management and being able to follow the US Farm Lease leasing process.

## Advantages of Becoming a Preferred Professional:

- Expand your business income and client network by helping landowners with their land needs and by utilizing US Farm Lease's on-line leasing tools.
- List your name and services in our searchable database of affiliated businesses. Landowners and operators wanting to hire someone in your field of expertise will be able to find you by location and profession. Your business will be featured alongside other services related to the ownership and leasing of farmland:

Commodity Marketing  
Coops  
Crop Insurance  
Financial Advisors  
Real Estate

Consultants  
Crop Advisors  
Farm Managers  
Lenders  
Soil Testing

- With each lease you offer, operators and other owners will potentially be directed to your website.
- Other advertising opportunities may become available for additional fees.

## Fees for Owners and Preferred Professionals:

The cost to landowner is minimal in the 2009/2010 crop year. We assess a \$50 listing fee and an optional \$399 advertising package for landowners. Any other fees you charge would be based on the services you offer independently of US Farm Lease. USFL will not cut into your bottom line. You can assure your clients that they are receiving a fair return while having a solid, conservation-minded lease in place.
